

The ties forged around the world in 2025... building momentum toward a promising 2026!

Life sometimes holds wonderful surprises that broaden and enrich our horizons, allowing us to cultivate optimism. This is what we would like to convey to you after listening to and observing the stirrings of the last few weeks of the year that have just passed...

Indeed, a new global inclusive momentum around shared meaning is underway, and this gives us a breath of fresh air in the face of the divisions that pushes us down by cultivating pessimism.

The year 2025 [Oui Ensemble](#) is therefore coming to an end, rebounding into the new year 2026 with the momentum of the bonds forged [in unison between France and Laos](#).

Thanks to our inventive approach to caring for each tree of life, as well as our optimism, which is far from naive, we are even more positive because it turns out that our bonds are rooted in international ramifications that are much broader and more promising than we had anticipated!

Intergenerational bonds woven with friendship and brotherhood in constant evolution...

...Bonds that are passed down from generation to generation, nestled at the heart of our balance and health, cultivating a unified vision of medicine, where Western and Eastern knowledge complement each other to preserve what connects us and helps us grow together.

...Bonds that are expressed through respect for cultures, languages, and a set of values, beliefs, traditions, norms, knowledge, and behaviors that shape a group's identity.

...The bonds that manifest themselves in the arts, crafts, rituals, architecture, stories, and daily lifestyles, serving self-expression, social cohesion, and adaptation to the environment as illustrated by the [new EUROPEAN handbook on climate law and its equivalent for ASEAN](#).

We wish you a sincere New Year 2026 rich in human connections! ❤️
